### Weekly Schedule and Outcomes

- Apply your knowledge of neuroimaging and whether it can be used to diagnose brain injuries

**Tutorial 2, Date: January 17, 2023**  
**Sensation and Perception, Chapter 4 (Krause et al.)**

By the end of this tutorial, students should:

Understand the difference between sensation and perception, and what the terms stimulus threshold and signal detection theory mean.

Understand how visual information travels from the eye through the brain to give us the experience of sight, and how the structure of the eye allows this functional transformation to be communicated to the brain

Understand the theories of colour vision.

Apply your knowledge to explain how we perceive depth in our visual field.

Analyze how we perceive objects and faces.

Understand distinct characteristics of sound and how they correspond to perception.

Apply your knowledge of sound localization

Apply your understanding of the diverse ways we explain our own behaviour versus the behaviour of others  
Analyze whether people who commit discriminatory acts are necessarily prejudiced  
Know the research on attitudes, behaviour, and effective communication  
Understand how behaviours influence attitudes in terms of cognitive dissonance theory  
Apply understanding of the central route to describe how a message should be designed

**Tutorial 10, Date: March 21, 2023**  
**Health, Stress and Coping, Chapter 14 (Krause et al.)**

By the end of this unit, students will explore the basics for good health choices and behaviours, and be able to apply healthy coping mechanisms to their own lives and identify when their choices and behaviours fall out of line with those supports. A major assignment matches this unit in Revel. Students will be able to:

Know the key terminology related to health psychology  
Understand how genetic and environmental factors influence obesity  
Apply your beliefs about obesity to better understand sources of prejudice and stereotyping  
Analyze whether media depictions of smoking affect smoking in adolescents  
Know the key terminology associated with stress and illness  
Understand the physiological reactions that occur under stress  
Understand how the immune system is connected to stress responses  
Apply a measure of s6( )7(t)7(h)4 nBT/F1 12 Tf1 0 0 1 54.025 533.93 Tm0 g0 [h]-6(o)-6(i)-6(ce)-6
